

Ucha05 Ucha10 – Simple chargers for 10-150 mA cells

These low cost single cell charger is powered by any USB port. A connector can be added to receive the current from a 5 to 6V DC supply.

Bahoma magnets charges 5mm and 10mm Plantraco Lipos. A connector or direct wires can be soldered if you do not use Bahoma.

Ucha05 uses 5mm pitch Bahoma and is planned for 20 to 50mA Lipo. Charging current is fixed, 35mA and can be modified by unsoldering a resistor.

Ucha10 uses 10mm pitch Bahoma and is planned for 80 to 150mA Lipo. Charging current is fixed, 100mA. USB is limited to 100 mA, it is not recommended to change the resistor. The charger circuit is limited to 150 mA if an external supply is used.
